Our two year graduate training plan provides her with support and exposure to a wide range of areas including the role of a scheme secretary, investments and actuarial valuations. This will allow her to build her pensions knowledge and develop in her role.

Simi has started with four main clients to get a rounded view of the work we do, concentrate on learning the ropes and understand how pension schemes operate. She helps the governance team by dealing with member related queries, updating scheme governance documents and action logs, collating online meeting packs and providing secretarial support.
